

# EU30is

## 3000W Compact Inverter Generator

### Extended run time

Generating a maximum output of 3000W and a variable load run time of between 7.1-21 hours on a single tank of fuel.

### DC output

Up to 12A to charge batteries (optional cable required).

### Electric start

Key operated for effortless operation.

### EcoThrottle®

Automatically adjusts engine speed to precisely match the load to save fuel and engine life.

### Superb reliability

Legendary durability from Honda's commercial grade OHV series 4-stroke engine offers easy starting every time.

### Super quiet

Noise-reducing casing and acoustic panelling, combined with EcoThrottle® greatly reduce operational noise.

### Inverter technology

Unique micro-processor delivers 3000W of super stable clean power essential for powering sensitive electronics and computers.

### Parallel operation

Optional cables allow two units of the same model to be linked together to provide double the rated output.

### Transport wheels

Allow a single user to move the generator around.

The EU30is is ideal for the more demanding user requiring up to 3kW of near silent, stable power. Honda's unique Inverter technology provides unsurpassed power stability and keeps size and weight to a minimum. The fully-enclosed and acoustically insulated design keeps operational noise to just 49dB. EcoThrottle, delivers excellent fuel economy and extended running time of up to 21 hours without re-fuelling by automatically adjusting the engine speed to run only as fast as the load demands. Wherever you need to power or recharge your equipment, you can rely on Honda's EU30is to provide it.
