

TIG ZONE®

eVo - FLO Cover Nozzle

TIG ZONE® designed and developed the new eVo-FLO Cover Nozzle ready for all demanding welding applications.

With an orifice of 27mm the eVo-FLO Cover nozzle provides a large inert atmosphere for the welding of reactive metals such as titanium, molybdenum, nickel - based and aluminium based alloys as well as non - reactive metals like stainless steel. An additional benefit is the ability for greater electrode stick - out (up to 50 mm) for better visibility of the puddle.

- Available for 1,6mm – 2,4mm – 3,2mm tungsten
- Weight advantage against standard jumbo Lens
- Interchangeable Lens screens
- Fits standard hand held torch models
